

CONFINED SPACE ENTRY & MONITOR

Course Code 6880

Course Duration: 8 Hours

COURSE OVERVIEW

Confined spaces can be an extremely dangerous work environment. Understanding and controlling the hazards provides workers with an ability to safely enter these environments.

- Hazard identification
- Risk assessment
- Classification of spaces
- Atmospheric testing and monitoring
- Control measures
- Permitting and planning
- Emergency response requirements

COURSE DESCRIPTION

This one-day program will teach participants to safely identify, assess, monitor and enter these locations. The classroom program will be combined with a practical workshop to allow students an opportunity to exercise the knowledge they have gained from the program.

The course material will provide students with an interactive and enjoyable learning environment.

Take home: course manual and wallet sized certificate. Certification is valid for 3 years from the course date.

*Please note: training is provided in relation to NWT rules and regulations.
Kasteel can also provide additional endorsements for other provinces as well.*
