

FALL PROTECTION

PROTECT YOUR WORKERS

Fall protection is required after 3 meters (10') off the ground.

Course Duration: 8.5 Hours

COURSE OVERVIEW

The program includes both theoretical and practical application and testing on the following topics:

- Facts and dynamics of falling
- Governing bodies and regulations
- Shared and personal systems
- Fall protection planning
- Anchor points
- Connectors
- Clearance and free fall calculations
- Harness fitting workshop
- System analysis workshop
- Equipment care inspection workshop
- Rescue requirements

COURSE DESCRIPTION

This full day end-user fall protection program is developed by Fall Protection Group Inc., a leader in North American Fall Safety.

The program includes theory, tools and knowledge of fall protection to safely work at height in the specified Canadian jurisdiction.

The course material is energetically delivered, includes case studies, hands-on activities, and focuses on student participation. This course includes a mandatory written theory test. The certification is valid for 3 years from the course date.

Take home: course manual and wallet sized certificate.
